read per 2003 i creencies de la classe més gran d'alumnes Please accept my sincere thanks for your superb, courteous and speedy service provided to me on the purchase of my new Versaclimber. My particular “problem area” was for a chair, which I badly needed for use in my home office, with a swivel base to fit my desk height. I don't use my Versaclimber much, but I kept it because it is very comfortable and looks the business. I decided to buy a new Versaclimber about three months ago and although the price of the product was extremely tempting, I held out for a more reliable manufacturer – and the price of the Versaclimber was no exception. Then, when you told me the new price, I couldn't believe it! The price has dropped dramatically! A price which I can't match. A special thanks to all the staff at Leigh Sales Gardners who were so helpful when I visited you for the first time about a month ago. When I mentioned the new Versaclimber price to you, you just couldn't believe my good fortune in being able to afford one! If you run a “sales” display in your store, please display Versaclimbers. You'd sell a million of them in a minute! If I were a “brand”, I'd buy you out and take over the Versaclimber line! I am so glad I went for the Versaclimber.

Q: File Handling Issue I am creating a program which copies files using the network, but I am facing a problem regarding file handling. I use the following code: public void copyFile(String destinationPath, String sourcePath) throws IOException { FileInputStream fis; FileOutputStream fos; //Copy File from the given sourcePath to the given destinationPath. try { fis = new FileInputStream(sourcePath); fos = new FileOutputStream(destinationPath); byte[] buf = new byte[1024]; int len; 82157476af
